

ERGOS SHIELD- EMAIL DEFENSE

Easy to implement, comprehensive, and intelligent email security protecting the most exposed part of your business.

**STOP
PHISHING**

**PREVENT
SPOOFING**

**EDUCATE
EMPLOYEES**

EMAIL SECURITY SOLUTION OVERVIEW

Phishing and impersonation-based email attacks are the #1 vector for cyberattacks of all kinds. The ERGOS SHIELD - Email Defense platform stops these attacks by automating implementation and ongoing management of email authentication. Leveraging open standards, such as SPF, DKIM, and DMARC, the platform ensures that unauthorized senders using an organization's domains in email messages are automatically blocked globally.

In addition to these countermeasures, ERGOS SHIELD - Email Defense provides ongoing testing, reporting, and training of end users to ensure that your employees are prepared and educated to handle email threats.

IMPLEMENT WITH EASE

Traditionally, email authentication enforcement requires a tremendous amount of effort for companies to implement themselves or with their managed IT providers. ERGOS SHIELD - Email Defense automates this process to remove the time burden for implementation as well as upkeep, allowing you to focus on your business and trust that your email systems are protected and secure.

MITIGATE THE RISK

Compromised email is a very real problem for businesses of all sizes...

EMAIL PHISHING
AND SPOOFING
ATTACKS ACCOUNT
FOR OVER

**\$12.5
BILLION**

in costs worldwide
over the last
5 years.

DOMAIN
SPOOFING
IS USED IN

**5%-
15%**

of all email
attacks.

MORE THAN

50%

of companies have
seen their domains
impersonated by
attackers in
attempts to
compromise
their network and
well-being

ERGOS SHIELD Email Defense provides the layered defense and training necessary to minimize these types of attacks on your organization.
